October 11<sup>th</sup>, 1865.

Medical Dispensary Clinic at Blockley

Case of Ascites - <sup>(mag)</sup> Swelling of abdomen, fluctuation  
swelling of lower extremities, pitting on  
pressure, tongue coated with a white malous  
Prognosis, unfavorable

Case of Fever of a grade between typhus & typhoid  
Tongue-coated, eye-protruding, some  
delirium, rolling of eyes & head  
treatment, quinine, (mag) favorable

Oct-14<sup>th</sup>, 1865 Blockley

Case of Intermittent fever, Diagnosis (Chills  
every day, enlargement of the spleen, dropsy  
in extremities, tongue of a pinkish color.  
Treatment - quinine - painting the chest  
with Iodine.

Case - Inflammation of cell tissue.  
Extremities elastic. emaciated. hard  
Formerly had dropsy. Treatment -  
mechanical. Arum. Fowler's Sulphur

Oct 11<sup>th</sup> 1865 Surgical Clinic (Blocky)  
Case 1. Eleven case of conjunctivitis, The eye unable  
to bear the light, upper eyelid most effected,  
when passed over the eyeball, seems as if  
sand were in the eye, the papilla distended  
with blood. Treatment - Clipping the  
distended blood vessels & washing immediately  
with cold water.

(2<sup>d</sup> Case) Stricture of the sphincter muscle of  
the bladder, caused by a ball passing  
through the abdomen, treatment - The  
introduction of the catheter which gave  
rest to the muscle and allowed it  
to assume its usual tone.

(3<sup>d</sup>. Case) Removal of the metatarsal bone  
of the second toe.

Oct 14<sup>th</sup> 1865 Blockley

1) Ulcer on leg skin partially grubbed  
over, without granulation; removal of  
skin.

2) Fistula in ana

of old. Most of the houses  
are built of stone, and some  
are made of wood. The roofs  
are covered with tiles, and  
the walls are white. There  
is a small garden in front of  
each house, and a path leading  
to the door. The houses are  
all built in a row, and there  
is a fence around the garden.  
The garden is very small, but  
it is well kept and looks  
very nice. There is a small  
pond in the garden, and a  
little bridge over it. The  
bridge is made of wood, and  
it is very old. The water  
in the pond is clear, and  
there are some fish swimming  
in it. The garden is very  
quiet, and it is a nice place  
to sit and relax. There  
are some trees in the garden,  
and they are very tall and  
green. The leaves are very  
large, and they are very  
beautiful. The garden is  
very peaceful, and it is a  
nice place to spend time.

Blackley, Medical Clinic, Jan 22, 1966. (Slate)  
(Scoloma refusans) (harmless) (see below)  
softens, fatigued, Diagnosed. And this is the name of the  
affection from an affection of the cellular lining of the  
jaws and so, much affected, drawing off the  
muscles which have been used in some time, of course of  
the hour, should I bring up the subject of the muscle of the  
left hand. This is of the forearm bone, which is called  
shoulder of the left arm. The arm has been used  
by a cervical rib (Genuina & bone),  
but neither the one nor the other can  
be removed. (Cervical elevation, that is, removal  
of the bone of the shoulder.

Medical Clinic. Jan 24<sup>th</sup> 166 (Sticks)

(Valvular disease of Heart. Bright's disease of the Kidneys)

Patient. Male Diagnosis. Aged 26 yrs. Had acute rheumatism some yrs ago. Never sick until march last, when he had swelling of the lower extremities, extending upwards involving the body and head. Violent cough with expectoration. Palpitation of heart. Nearly pint of blood discharged from the lung. Urine bloody and scanty. Congestion of the kidneys resulting from exposure. No dropsy at present. Sleeps very little, on account of pain in back, in region of kidneys. Blowing murmur in heart. Liver is enlarged, Sp. Gr. of urine 1012. Liver congested on account of the obstruction of the heart, which causes the dropsy, the albumen in the urine.

Mitral Valves diseased or obstructed, Valves of the Pulmonary Artery of a louder murmur than the Aorta.

**New Name: ABICAN**

To each fluid ounce of Light Pinus Canadensis there are added 24 grains each of pure Alum Potash and Sulphate of Zinc and .48 grain Thymol. THE LIGHT PINUS CANADENSIS SHOULD ONLY BE USED AS AN INJECTION AND EXTERNALLY. *In all other cases the Dark extract should be used.*

**KENNEDY'S PINUS CANADENSIS**—Is a highly concentrated product. Hence the following suggestions for its use:

**FOR GONORRHEA OR GLEET**—One part of the extract in seven parts of water, for injection three or four times a day.

**FOR LEUCORRHEA AND OTHER VAGINAL CONDITIONS**—A teaspoonful or two of the extract in a pint of warm water, injection twice a day. For obstinate cases a stronger solution.

**AS A DOUCHE**—Kennedy's Light Pinus Canadensis is of very great value in leucorrhea, and should be prescribed as a douche twice daily—one to three tablespoonfuls to the quart of water, as hot as can be borne. Vaginal tamponade with KENNEDY'S LIGHT PINUS—four drams to the ounce of glycerin—is exceedingly useful as a local tonic to the vaginal mucous membrane.

**Kennedy's Pinus Canadensis—DARK—Non-Alcoholic**  
**New Name: DARPIN**

**ALKALINE MEDIUM**—When an internal mucous astringent is indicated, in such cases as cholera infantum, etc., KENNEDY'S DARK PINUS CANADENSIS should be given in an alkaline medium.

**AS AN INTERNAL REMEDY IN DIARRHEA, DYSENTERY, NIGHT SWEATS, HEMORRHAGE, PROFUSE EXPECTORATION**—One part of extract to five of warm water, after cooling, teaspoonful doses every three hours, or oftener, as required.

**FOR SORE THROAT**—A teaspoonful in a half-pint of warm water, cooled and used as a gargle, repeating as required.

**FOR CATARRH**—One or two teaspoonfuls in a pint of warm water, applied as a nasal douche twice a day.

**FISSURES OF THE ANUS, ULCERS, BURNS, OR SCALDS**—Apply in full strength.

**FOR PROTRUDING OR ITCHING PILES**—Add one-fourth of glycerin and apply as often as convenient.

*Linen soiled with DARK PINUS CANADENSIS should be soaked in cold water over night and then laundered.*

RIO CHEMICAL COMPANY, 79 BARROW STREET, NEW YORK CITY, N. Y.

## Gonorrhea in the Male

### ACUTE STAGE:

**R** Abican..... 1 ounce  
Rose Water..... 7 ounces

**M. Sig.**—Inject 2 or 3 syringefuls four times a day until discharge becomes thin and watery then use one of the injections following:

### SUB-ACUTE AND CHRONIC STAGE:

**R** Darpin..... 1 ounce  
Rose Water..... 4 ounces

**M. Sig.**—As injection three times a day until discharge disappears.

**R** Fluid Ext. Hydrastis..... 1 ounce  
Morphin Sulph..... 7 grains  
Abican..... 1 ounce  
Witch Hazel Dist. } equal parts  
Distilled Water } to make 8 ounces

**M. Sig.**—As injection three times a day until discharge disappears.

**R** Lead Acetate..... 24 grains  
Abican..... 1 ounce  
Distilled Water..... 6 ounces

**M. Sig.**—As injection three times a day until discharge disappears.

### GONORRHEA:

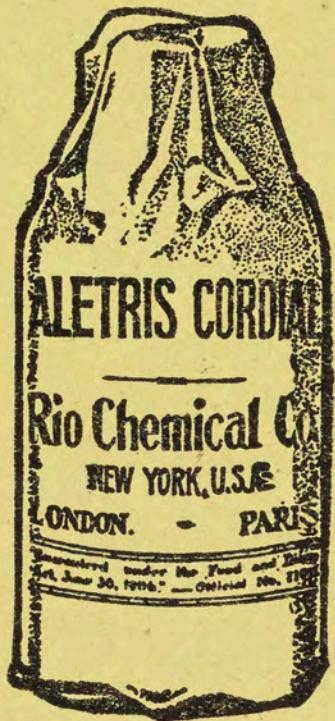

**R** Fluid Ext. Hydrastis..... 1 ounce  
Abican..... 1 ounce  
Distilled Water..... 8 ounces

**M. Sig.**—As injection three times a day until discharge disappears.

“G. P's,”

# The Menopause

A most trying period to woman and a condition  
more or less perplexing in its treatment.  
*Gratifying results are reported from the use of*

## **ALETRIS CORDIAL RIO**

as a Uterine Tonic  
and

## **CELERINA**

as a Nerve Tonic

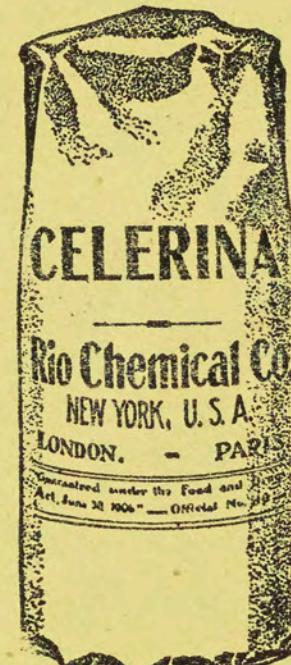

equal parts, making the dose one teaspoonful  
one hour before meals and upon retiring.

## **"G. P's"**

To the professional mind these initials need no explanation, but "Grateful Patients" bring delight to the Doctor. A trial of the above combination in most cases means

## **"G. P's"**

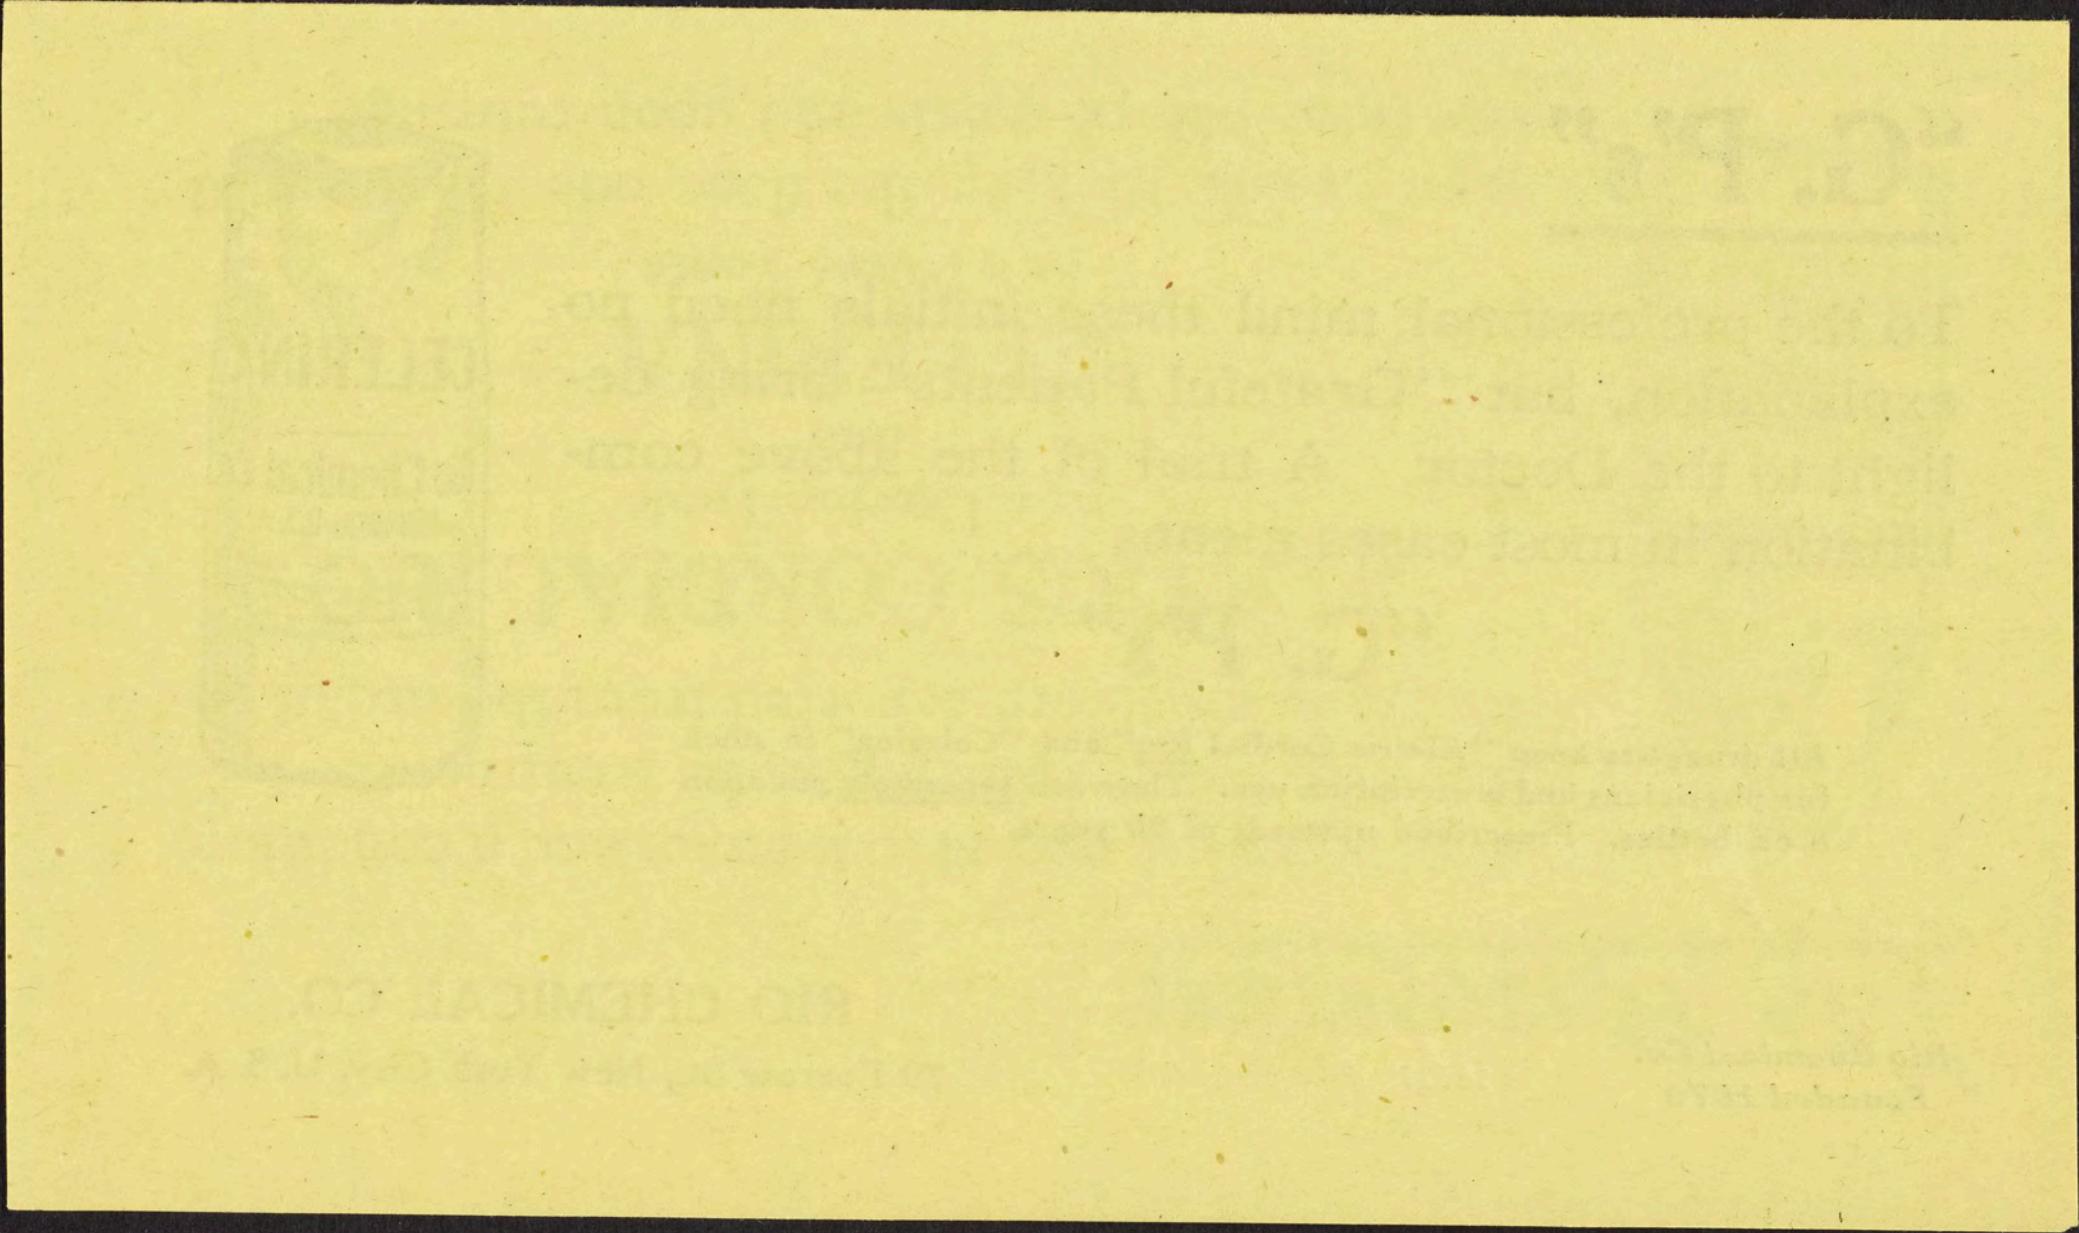

All druggists keep "Aletris Cordial Rio" and "Celerina" in stock for physicians and prescription use. They are separately put up in 8 oz. bottles. Prescribed upwards of 30 years.

Doctor -

Herewith the only books  
found. One of my Father's  
of Japanese and one of  
Dr Barker of University of  
Cincinnati - who studied & printed  
under my Father.
